

C65 AM 2 VEV Special Edition

Owner's Handbook

 Christopher
Ward

Time on your side

Your Christopher Ward watch has been designed in Britain and engineered in Switzerland by highly talented craftspeople. This ensures not only accurate and precise timekeeping, but also brings a real pride of ownership that only watches of the highest quality standards can hope to deliver.

You have made an investment, a good one, and the aim of this manual is to help you make the most of that investment in what we hope will be a lifetime of ownership.

CEO & co-founder

C65 AM 2 VEV Special Edition

All the watches tell the time.

But some tell a story, too. And that's the case with your C65 AM 2 VEV Special Edition.

The story is one of British motorsport history coming together with Swiss watchmaking expertise.

When you strap the watch on for the first time, you'll be struck by that 'speedo' dial. This isn't just a design whim, but a deliberate nod to the dashboard to one of the great British sports cars, the Aston Martin DB4 GT Zagato. And while you'll tell the time in the traditional way, those 0-60 numerals around the dial remind you of the watch's racing-car DNA.

But the C65 AM 2 VEV Special Edition is more than a regular watch. Thanks to its exceptional Swiss-made quartz chronograph movement, it delivers a wealth of timing options, with readings down to one-tenth of a second.

So whatever you're monitoring – and isn't it magical when the centre-stop seconds hand starts to tick? – you'll get a figure you can rely on.

Your only task is working out what you're going to time first.

Features

- Swiss made
- Limited edition 150 pieces
- Up to 72-month power reserve
- 27 jewel quartz chronograph
- Hour, minute, small second, date, central 60 minute counter, centre stop second (1/1 sec), 12 hours counter, tenths second counter
- 316L stainless steel case
- Black DLC steel bezel with Tachymeter markers in white lacquer
- Tri-compax dial layout
- Super-LumiNova® Grade X1 GL C1-filled hands and printed numerals
- Anti-reflective flat sapphire crystal
- Screw-down crown
- Deep-stamped screw-down backplate with unique engraved serial number
- Eco-friendly luxury presentation case and owner's handbook

Technical Information

Calibre	ETA 251.233/1
Case	316L stainless steel
Diameter	41mm
Height	12.2mm
Weight	75g
Water resistance	15 ATM (150 meters)
Lug to lug	47.1mm
Strap width	22mm

Setting the time and date

For a superior water resistance your crown is of the screw-down type. The crown should sit flush to the case (position **1**) in order to maintain water resistance.

- First unscrew the crown anti-clockwise from the case to position **2**.
- To advance or reverse the date, pull out the crown into position **3**. Turn in a clockwise direction to advance the date, anti-clockwise to reverse the date (please note the hour hand will jump in incremental steps). Once the hour hand passes

12 o'clock, the date wheel will begin to progress forward over a 2 hour period. Please note that the date wheel cannot be changed independently.

- Pull gently into position **4**. This position is used for handsetting and stopping of the seconds hand. For precise time setting it is recommended to pass beyond the desired minute and to set the hand backwards.

1. Crown screw-down position
2. Unscrewed position
3. Date setting
4. Time setting

Using the chronograph

START

Press push-button **A** to start timing.

PLEASE NOTE: Before starting the time, reset the chronograph hands to their original position. See the Reset section to set the counters to zero.

STOP

To stop the timing, press push-button **A** once more and read the 12 hour counter, 60 minutes counter, 60 seconds counter and 1/10 second counter. For example: 5 mins, 57 seconds and 7/10 second.

RESTART/STOP

To restart the timing, press push-button **A** again (timing is resumed).

To stop timing press push-button **A** and read the 4 chronograph hands. For example: 3 hours, 20 mins, 3 seconds and 4/10 second.

RESET

To reset the timing, press push-button **B** (The 4 chronograph hands will be reset to their zero positions).

Adjusting chronograph hands to zero position

One or several chronograph hands are not in their correct zero positions and have to be adjusted (e.g. following a battery change).

Adjusting the hour and minutes chronograph hands

Pull out the crown to position **3**. Press Button **A** to adjust the hour chronograph hand and button **B** to reset the 60 minute counter to zero.

Adjusting the stop second and tenths seconds hands

Pull out the crown to position **4**. Push Button **A** to adjust the stop second hand and Button **B** to adjust the tenths seconds hand.

When chronograph hands have been reset, return the crown to position **2** and screw-in to position **1**.

Adjusting the hour and minutes chronograph hands

Adjusting the stop second and tenths seconds hands

Straps and bracelets

As you would expect, we place as much emphasis on the quality of our straps and bracelets as we do our watches. We only use the finest materials in our straps, with quick-release pins also included for your convenience.

The following guidelines explain how easy it is to use, adjust and replace your Christopher Ward strap or bracelet.

Using the quick-release pins on your strap/bracelet

1. Locate the quick-release pin (or pins) on your strap (A) or bracelet (B). Pull the pin(s) inwards to detach.
2. To reattach your strap (C) or bracelet (D), pull the pin(s) inwards, and align the spring bars so that they click securely into the lug holes on each side.

How to use the micro adjustment on your bracelet

1. Press buttons to release.
2. Pull open the clasp.
3. There are five micro adjustment positions, which allows for a maximum extension of 8.4mm. To extend, pull the lever to unlock and simultaneously pull on the bracelet into the desired position.
4. To shorten, simply push the bracelet back into the clasp.

Water resistance

Although your watch has been through vigorous static pressure testing, it is worth remembering that there are many variables that can affect the water resistance of your watch. For instance, arm movements during swimming and the sudden impact of diving and water sports will drastically increase the pressure the watch is under.

Wearing your watch in the bath, shower, or sauna can also have an effect as a rapid increase in temperature can cause seals to expand and in extreme cases, malfunction or create condensation.

For these reasons, the water resistance rating of your watch (as shown) should only ever be considered a guideline and we strongly recommend they are always adhered to.

1 ATM (10 metres)

Safe to wear your watch while washing your hands with tap water

15 ATM (150 metres)

Safe to use while snorkelling in open water

100 ATM (1000 metres)

Professional deep sea diving

3 ATM (30 metres)

Washing your car and/or general hose pipe usage

30 ATM (300 metres)

Ideal for experienced divers and those practising scuba-diving

5 ATM (50 metres)

Water resistant to most household shower units

60 ATM (600 metres)

Professional divers, experiencing prolonged exposure underwater

60|60 Guarantee

Your watch is constructed from the finest components and materials available including one of Switzerland's finest mechanical movements. As with all watches of this quality, with the right care and attention, your new Christopher Ward watch has the potential to become an heirloom piece giving further joy to future generations.

It's for this reason we have created our industry leading approach to after-sales care, starting with our famous 60|60 Guarantee which remains the most comprehensive guarantee in the world of watchmaking.

60 Day Free Returns

Our success depends on you being completely happy with your new Christopher Ward watch. You have up to 60 days from despatch to return your watch, with free shipping, and receive a replacement or full refund, for which the watch must be in perfect, unworn condition and accompanied by all its original packaging and paperwork.

60 Month Movement Guarantee

Your watch has a top-quality precision engineered Swiss movement – but if it develops a movement fault within 5 years, and has been serviced by us at the recommended interval (within a maximum of 4 years from date of despatch), we will repair it for free under warranty. Not all mechanical problems or quartz battery replacements are

considered movement faults and your watch will need to be sent to us for diagnosis and service history checks, before processing a repair under warranty.

Servicing and Repairs - the Christopher Ward way...

Our innovative approach to service and repair means that having your watch attended to doesn't mean months of waiting followed by an exorbitant bill. We have developed a quick, easy and affordable expert service and repairs process that doesn't cost the earth and has the watch back where it belongs – on your wrist – in reasonable time.

We recommend you service your watch at intervals of 3-4 years to keep it in peak condition and to maintain your **60 month guarantee**. If your watch develops an issue within 60 months of despatch, we will first check its service history before progressing a repair. If you have not had your watch serviced at the recommended interval, we will not cover the cost of the repair under warranty, and will recommend a maintenance service in addition to any repair work due.

PLEASE NOTE:

The 60|60 Guarantee does not cover accidental damage. Any service or repair by a third party retailer will void your 60|60 Guarantee. For more details, please visit our website.

Keeping in touch with Christopher Ward

From small beginnings just 15 years ago (our first workshop was actually a refurbished chicken shed!), Christopher Ward has won a worldwide following and can justifiably claim to manufacture the most affordable luxury watches in the world. For many, the philosophy behind the brand, of trying to put luxury watches within the reach of everyone, is as smart as the watches themselves. The very open approach of the business sees Chris, Mike and Peter, as well as the rest of the team, spending lots of time communicating

personally with customers – listening to feedback which helps us continually improve as we grow. As the owner of a Christopher Ward watch, if you ever need to get hold of us we are at your service. There is always something new on our website, across our social media communities and on the Christopher Ward Forum – informative and fun, these are the best places to join the conversation about the latest new releases, news and offers in the world of Christopher Ward.
